the Future

2014

CONFERENCE
KITCHENER•ON

CSC Conference 2014 – TAPPING THE FUTURE
Kitchener, Crowne Plaza Kitchener/Waterloo
May 21-25, 2014

Session 4B
Date May 22, 2014
Time 3:30 – 4:30
Speaker Lyle Scott

LEED v. 4

LEED v4 was just released at the past Greenbuild in November 2013. It is intended to encourage and accelerate the global adoption of sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria.

LEED v4 includes new market sectors, time saving support tools, and new impact categories. This session will focus on what you need to know to implement LEED v4 on your projects

Speaker bio

Lyle Scott is a mechanical engineer with seventeen years' experience specializing in energy efficiency, facilities management, and sustainable development. As the managing Principal of Footprint, a consultancy dedicated to sustainability, Lyle provides the leadership required to help project teams improve energy efficiency, interior environmental quality and overall project sustainability.

He has served as a founding board member of Sustainable Buildings Canada and on the Canada Green Building Council's LEED® Management Committee, LEED for Homes Technical Committee, and several other CaGBC committees including the Technical Advisory Group, LEED 2009 Submittals Task Force, Core and Shell Task Force and the Durable Building's Task Force. He has served as a technical resource to the Cities of Toronto, Edmonton and Calgary and as an advisor to sustainability programs at Humber College, Ryerson University and the University of Toronto.

Lyle has played an instrumental leadership role in several sustainability "firsts" including the first CaGBC multi-residential building (Radiance, LEED-NC Silver) and the first CaGBC Gold certified high-rise multi-residential building (Minto Roehampton, LEED-NC Gold) in addition to many other LEED projects bridging all building types and sectors.
