

Tapping
the Future

2014

CONFERENCE
KITCHENER•ON

CSC Conference 2014 – TAPPING THE FUTURE
Kitchener, Crowne Plaza Kitchener/Waterloo
May 21-25, 2014

Session	5A
Date	May 22, 2014
Time	9:00 – 10:00
Speaker	Scott R. Armstrong, Dipl. Arch. Tech., A.Sc.T. LEED AP

Implementing Building Science & Sustainability in Structures

The world is full of promises for new and innovative solutions to problems few of us even know we have. The design and construction industry is not immune to this phenomenon as it pertains to the building envelope and sustainability – but what to do? This session will discuss contemporary approaches to building envelope material and assembly analysis, changes to conventional wall assemblies for improved thermal performance and air tightness, and improved integrated delivery models for the design and construction processes that help deliver high performance, sustainable buildings.

Speaker bio

Scott Armstrong is an Associate at MMM Group and is Manager of MMM's Building Science consulting services. Scott's expertise includes building envelope consulting and retrofits, roof consulting, sustainable cladding analysis, LEED consulting, integrated design facilitation, and green roof consulting for clients with new and existing buildings. His projects have spanned commercial, institutional, heritage, recreational, residential, and neighbourhood development sectors in Canada, the US, the Caribbean, and the Middle East. A LEED® Accredited Professional and past Board member of the Canada Green Building Council Greater Toronto Chapter, Scott is a regular speaker on the topics of both building envelope design and green building strategies.
