MEETING NOTICE

date: Tuesday September 10th, 2013.

topic: **LEAK DETECTION & ASTM STANDARDS**
This presentation qualifies for self-directed OAA credits. (see more details inside)

speaker: Pat Vokey, President, CEO, Detec Systems

location: Toronto Skating Curling and Cricket Club
141 Wilson Ave., Toronto
(1 block east of Avenue Rd.)

time: 17:15 Cocktails
18:00 Dinner
19:00 Presentation

cost: \$45 (HST incl.) members,
\$50.85 (HST incl.) non-members
\$56.50 (HST incl.) at the door,
\$226 (HST incl.) Booklet of 6 dinner tickets (members only)

reserve: Please make your reservation with Donna Fournier
of the CSC Toronto Chapter Office at 1-888-494-9350.

info: Program Committee Officer: Chris Hunter (Tel: 416-930-8766)

Chair's Message

By: Mark Clemmensen

"We are not the same persons this year as last; nor are those we love. It is a happy chance if we, changing, continue to love a changed person."

- W. Somerset Maugham

Mark Clemmensen
(Chair)

Welcome back everyone to another CSC calendar year!

As September quickly approaches, your Toronto Chapter Executive have been working diligently over the summer months to get ready for this upcoming year. We have yet another great team in place, dedicated to provide our membership with education and social events, enabling all of us to get away from the office and share our experience with others. Regrettably, we have also lost a few key members of our team who will be greatly missed. Steve Gusterson and Steve LeBlanc have both been a major part on our Executive Committee for a number of years and I speak for our committee when I say that I wish you the best and hope that you find your way back to our executive family in the near future.

Russ Snow, I would like to personally thank you for such a great job as our Toronto Chapter Chair for the past term. It was a pleasure working with you over the past two years and I look forward to your continued guidance as we move into this 2013/14 term. It seems like just yesterday when Steve Gusterson and Russ approached me to become 2nd Vice Chair and now it's time for me to continue to guide the Chapter in the right direction, as it has been heading for a number of years now.

Education continues to be in the forefront of our Chapter's mind, following the CSC mission statement, committed to ongoing development and delivery of quality education programs. This begins with our fall in-class course line up consisting of the PCD, Specifier 2 and the CTR programs. Sign up is currently available on our Chapter's web page, with classes scheduled to begin on September 9th and 11th. Winter courses will be announced and available for sign up

beginning in November so keep a look out for those as well.

Further educational opportunities are provided through our monthly dinner meetings and November plant tour. Our Program Committee has put together yet another outstanding line up of technical and general information subjects which our industry will benefit.

The No Frills Trade Show in March 2014 is ramping up to full steam as the luncheon speaker and free technical seminars are beginning to be finalized and posted to the Trade Show Website. Please note the **SHOW CHANGE OF DATE - NOW WEDNESDAY, MARCH 5th, 2014** due to a scheduling conflict at the Metro Toronto Convention Centre. *(Continued on Page 3...)*

Vice Chair's Message

By: Kaz Kanani

Welcome back to the 2013/2014 CSC Year! As summer is winding down, kids going back to school, we are pleased to begin the 2013/2014 year and I am honoured and humbled to be your Vice Chair, Web Site/ Communications Officer and Golf Tournament Chair. Over the summer, members of the Executive Committee have met to discuss this upcoming term, to plan events and also launched the CSC Toronto Chapter Membership Survey. We are in the process of reviewing the survey responses and will be using the responses to better tailor our events and offerings to you.

I would like to congratulate the Toronto Chapter Members who were awarded recognition at the Conference in Calgary – keep up the good work! Award recipients have been invited to our September 2013 Dinner Meeting and will be officially recognized and I would like to invite all members to attend this dinner meeting and congratulate your friends and colleagues.

The 26th Annual Toronto Chapter Golf Tournament was held on August 15, 2013 and was 100% sold out, well over a month in advance of the tournament. Tournament results will be released in the October Specifier. Special thanks to the organizing committee and the sponsors for this tournament would not be a success without all your hard work and assistance.

One of CSC's mottos is Education and the Toronto Chapter is pleased to offer 3 courses commencing this September. The Principles of Construction Documentation (PCD), Technical Representative (TR) and Specifier 2 courses are available and registration can be completed online by visiting the Chapter Web Site. For those that have not taken the courses, I encourage you to sign up and attend as these courses are taught by industry professionals who share their wealth of knowledge and experience when presenting the curriculum. In addition to the learning, these courses also prove to be a great networking tool as well. Space is limited, so register early to avoid disappointment.

Our Marketing Committee has updated the Chapter Sponsorship Packages and has released them online. Sponsorship is integral to the success of our Chapter and

Kaz Kanani
(Vice Chair)

Chair's Message (Cont.)

By: Mark Clemmensen

Lastly, the CSC Annual Conference is being held in our backyard in May 2014. Kitchener, Ontario is the host site for the 2014 Conference "Tapping the Future", and the star studded line up of technical sessions and companion tours makes this Conference one that can't be missed.

Other educational opportunities are being discussed with the possibility of a one-day seminar event outlining a number of challenging topics currently in our industry, so stay tuned for more information within the Specifier and on the website.

As my first article as the Chapter Chair comes to a close, I would challenge all of you who are interested in learning, and continuing the education which you completed in school, and any project experience which you have gathered along the way to come out and share your experiences with others. This is the only way that we as an industry can grow and ensure that we are able to continue to produce at the professional level expected from our clients.

"Success is not final; failure is not fatal: it is the courage to continue that counts." - Winston Churchill.

without the commitment from our valued Sponsors, the Executive Committee would not be able to put together many of the events and offerings. At the same time, our Sponsorship Packages have been designed in such manner that package holders save money over time. I encourage firms to review our packages and to confirm their commitment as soon as possible. CSC is one of the few organizations that brings individuals from various disciplines together and becoming a sponsor is an excellent way to reach out to the industry. Thank you to those sponsors that have already made the commitment.

The Executive Committee welcomes your input, comments and suggestions to improve our programs and offerings to you. Please do not hesitate to contact any member of the Executive Committee at any time. Our coordinates are available on the last page of the Specifier and are also available online. Looking forward to a fun and exciting 2013/2014!

Highlights from the Calgary Conference

By: Russ Snow

For those of you unable to attend the 2013 CSC National Conference in Calgary, you missed a fantastic event. Our Toronto Chapter had 39 attendees putting on their cowboy hats and spurs, jumping onto the wagon train (well, hopping on a plane), and traveling to the Wild West. Well, it wasn't really wild, but it was a fantastic event! I would like to thank the Calgary Chapter for going all out and providing all the attendees with a conference that included a varied selection of educational technical sessions, some standing room, a jam-packed Connections Café, and a Fun Night where us city folk could try our luck at line dancing. Once again, the Members Forum and AGM showed how passionate our members are to the growth of the CSC with a number of great discussions.

Russ Snow (Past Chair)

On Saturday at the Annual Awards Luncheon, a number of our Chapter Members were honoured for their support and dedication to CSC at all levels.

COLLEGE OF FELLOWS

The CSC College of Fellows recognizes those members that have made an outstanding contribution to the Association's enhancement. Those individuals chosen must be a member for at least 10 years, have made outstanding contributions, and be nominated by at least seven members from three different Chapters (three of which must be Fellows themselves).

Bruce J. Gillham, FCSC, CTR, CCCA, has been part of the CSC since 1999 and has more than 25 years of experience in the construction industry. He has been a mainstay in the Toronto Chapter serving as our Vice-Chair, Chair, Director, and on the 2004 Conference Committee. Bruce has always been a strong proponent of the CSC educational programs, achieving his CTR designation in 2000 and CCCA status two years later. For several years, he taught the CTR Level II course, assisted with the PCD program, and was a panel

member for final examination of candidates for CTR certification. He has also participated in the developing a curriculum process, which established the content of the educational topic material in the redevelopment of the CTR and CCCA education programs.

In addition, Bruce was elected CSC 4th Vice President in 2007, and served as the Association's President in 2011/2012. Throughout his term, he saw the completion of the Specifier 2 course, enabling CSC to finalize the requirements for the Certified Specification Practitioner (CSP) designation. In addition, the online version of Specifier 1 was completed, the Education Maintenance Task Team (EMTT) was established, and the Rules of Engagement and Rules of Order were developed for the Board of Directors. Bruce continues to be an editorial advisory board member of Construction Canada magazine. Congratulations Bruce!

CHAPTER AWARD OF MERIT

Steve Gusterson, CTR

What can be said about Stevie G that everyone doesn't already know? Steve has been an integral part of the Toronto Chapter Executive for a number of years and his professionalism, dedication, work ethic and sense of humour is next to none. Steve has committed a great amount of time to our Chapter, including two years as Vice-Chair, Chair and currently Past Chair. Over these four years, Steve has been implemental in the many changes within our Chapter. During Steve's tenure as Chair, he provided great leadership and has made decisions that will allow the growth of our Chapter for years to come. As Past Chair, he has continued to provide the support and guidance for all the members, and will continue to do so. Steve just doesn't know when to say no and is currently reviewing course material to teach our TR course in the future. In addition, outside of our Chapter Steve will also be fulfilling a commitment he has made to the Ontario Glass Association. Thank you Steve, you deserve this award. *(Continued on Page 5)*

Highlights from the Calgary Conference (Cont.)

By: Russ Snow

Steve LeBlanc, CTR

When we all sit back and think about the individuals within our Association that put the Association first, Steve LeBlanc's name would be one that comes to mind. He is one that can certainly say "I am CSC" and would not be questioned. Over the years, Steve has volunteered at both the Chapter and National levels, and listing all of his accomplishments would be too numerous to mention, and knowing Steve, he would not want that. However, his commitment and dedication to the Association should definitely be recognized. As our current Chapter Director, Steve has represented our Chapter with great integrity. The guidance and "reality checks" he provides at our Chapter is only surpassed by his professionalism and respect that he has by all of our members. Steve has been an invaluable part of our Chapter over the years and he has made himself a vital part of the Toronto Chapter family. Steve, you are well deserving of this award and thank you for everything you have done for our Chapter.

Steve Ioannides, CTR, CSP

Yes, another Steve, or affectionately known as "Cowboy". Steve is one person that if asked, will do absolutely anything for the Chapter, even if it means volunteering for other Chapters. Over the years Steve has been involved, he has been our Specifier Editor and Student Officer, both very difficult positions that certainly come with their fair share of challenges. Steve has always stood up to these challenges with a smile on his face and has done great things for our Chapter, many of which go unrecognized. In his current position, Steve continues to promote CSC at various colleges and student events ensuring that the next generation is aware of CSC and a career in specification writing. Steve is a deserving recipient of this award and we should all look forward to his continued support and dedication to our Chapter, and CSC.

Paul Wong

Paul is the first recipient of the Toronto Chapter Award of Merit this year not named Steve. This is Paul's first year on our Executive and jumped into the Professional Development Officer's position with excitement and

enthusiasm. As part of CSC mission is to develop and deliver quality education programs, this is one of our most important and challenging positions. Paul had some big shoes to fill from his predecessor but has done a fantastic job promoting, and organizing our courses. In fact, this current term we are running CCA, TR, Specifier 1, and Specifier 2 courses. Paul has single handedly made all the arrangements, attained all the required course materials, as well as scheduling TR panel presentations. The transition has been seamless. Paul has some great ideas moving forward and I am pleased to say that he will be continuing in this role and is very deserving of this award. Congratulations Paul.

Wayne Austin

Another fairly new member to our Executive is Wayne Austin. Wayne joined our committee as Marketing Officer which is another difficult portfolio and has done a fantastic job in this position. Wayne has dedicated many hours promoting our Chapter to the members, as well as coordinating all of our sponsors at the various events we offer, and has certainly made a difference. This takes a considerable amount of time and organization, and Wayne is the person that can get this done. Wayne's commitment, dedication, and attention to detail, has allowed him to excel in this position. He has some great ideas moving forward and we are all excited that he has decided to remain on the Chapter's executive as the new Specifications Officer. Congratulations Wayne.

Chris Hunter, CTR, CCCA

Chris is a second time recipient of this award and it is well deserved. Chris has been our Program Committee Officer for a few years and he continues to do a fantastic job sourcing out interesting topics and knowledgeable speakers for our dinner meetings. Chris also organizes an annual plant tour which is always very well attended. When many of us take a break throughout the summer, Chris is working diligently lining up our speakers to ensure that we have a full offering at the start of our season. Certainly not an easy task. Chris is very well organized, and welcomes our speakers ensuring that they have everything they need. It is always interesting working with Chris and sometimes unpredictable; however, his professionalism and dedication make him a very worthy recipient of this award. Congratulations Chris. *(Continued on Page 6)*

Highlights from the Calgary Conference (Cont.)

By: Russ Snow

Program Directors Awards

The Program Directors Awards are presented to an individual member, group of members of CSC or other individuals because of a significant contribution to a CSC Program. These awards are presented at the discretion of the Program Directors.

Technical Studies

Forrest D. Grierson, RSW, was one of the four recipients of the Program Directors Award for Technical Studies this year. He was honoured for his efforts on the Multiple Work Packages development and review process, along with his contribution to the CSI's task team to maintain a North American voice to this valuable document.

RUSSELL W. CORNELL AWARD

Previously known as the Eureka Club Award, this is awarded to the member responsible for bringing in the most new members. During 2012, CSC had 229 new members with 72 of these being sponsored by CSC members. Steve Gusterson, CTR, was a runner-up for this award.

F. ROSS BROWNE AWARD

This award is presented to the author of the previous year's best written article in Construction Canada as judged by the Associations Executive Board. Russell Snow, CTR, CSP, was the recipient of this award for his December 2012 article on "Understanding Waterproofing."

MEMBERSHIP LONGEVITY AWARDS

A number of CSC members received longevity awards and below are the names of the Toronto Chapter members. I am amazed at the length of commitment a number of our members and appreciate the dedication and support that each of the well deserving recipients has given our Association.

50 years - J.M. Minialoff, H.D. Thiess

45 years - Peter Rohmann, Peter Zahradnik, RSW

40 years - Craig Bell, FCSC; Dinshaw Kanga, FCSC; James Kerrison, RSW; Hans J. Schmidt

35 years - Christopher Borgal, Norman Bresser, Boyd R. Bruhm, Jon A. Gravell, Don B. Marks

30 years - Ronald L. Johnson; Jaak Kaarus; Bruce D. Taylor

25 years - Leo Cammalleri; Steve Clayman; Mike Grace; J. Morcone; Don Shortreed, FCSC, RSW

20 years - Malcolm B. Eyre; Aldo F. Filice, CCCA; Ragaa N. Tadros

15 years - Victor Lee Baker; John Blair; Steven P. Boudreau, CCCA; David Gaunt; Billy Lai; Nancy McPherson, CTR; Robert Menchetti; Mila Omelchenko, RSW; Ruth Shannon, CTR; Joel P. Sullivan

10 years - Gerald Atkin; Chris Eichhorn; Jeff Fabian; Michael Kresin; Peter Kubas; Stephen Lau; Dave Lawlor; Walter E. Mayer; Erik Tolles; Agnes Vermes; Domenic Zavarella; John Zilli

Congratulations to all members that were recognized with awards at the Calgary conference.

Electronic Leak Detection Methods for Locating Leaks in Waterproof Membranes

This Presentation qualifies for self-directed OAA Credits

The failure to detect and correct membrane defects during and as soon as possible after installation can cause premature failure of the membrane. Problems include design deficiencies, faulty application of the membrane system and damage by subsequent trades. Roof designs incorporating a waterproof membrane under overburden such as a vegetative roof, insulation layer, wear-course, or topping slab greatly exacerbate the problem of leak locating

This presentation addresses the need for a systematic procedure to test, verify and monitor the integrity of waterproof membranes using electronic conductance measurement methods to locate leaks in exposed or covered waterproof membranes. The methods described are used on both conventional and protected roofs and are particularly useful for roof designs that incorporate a waterproofing membrane under a green roof, wear-course or topping slab where direct

inspection of the roof membrane is difficult or impossible.

This presentation is based on a new ASTM draft guideline describing electronic leak detection methods.

SPEAKERS

DAVID VOKEY

DAVID VOKEY is a founder, President and CEO of Detec Systems, LLC. He graduated from the University of Manitoba with a Bachelor of Science Degree in Electrical Engineering in 1973, and a Master of Engineering Degree from the University of Manitoba in 1984. Prior to co-founding Detec Systems, he worked for Siercor Corporation (now Corning Cable Systems) as the Manager of R&D for Cable Development, responsible for the design and development of fiber optic cables. David holds over thirty five patents worldwide. He is a member of IEEE and a member of the Association of Professional Engineers and Geoscientists in both British Columbia and Manitoba.

HYDRALASTIC

836

A superior cold-applied, single-component waterproofing compound

HYDRALASTIC 836 keeps water where it belongs – whether it's applied inside, outside, horizontally or vertically! Designed with specifiers and end users in mind, this cold-applied, 98% solids, single-component compound is ideal for positive side waterproofing for foundations and in between-slab applications.

HYDRALASTIC 836 is fast curing, low odor, solvent-free, resistant to early rainfall and able to withstand temperature extremes without cracking shrinking or slumping. Suitable for both above- and below-grade applications, **HYDRALASTIC 836** offers superior performance along with a variety of other benefits:

- Bonds to concrete, asphalt, wood, metal – may be applied to green concrete.
- Compatible with asphalt protection boards.
- Easy application translates to time and labor savings.
- Excellent elasticity and rebound characteristics.
- 98% high solids formulation means no shrinkage and increased coverage as compared to competitive products.
- No blisters due to solvent outgassing.
- No primer required.
- Extremely low odor.
- Will not harm EPS or styrofoam materials.
- Meets ASTM C 836.

Getting to know Sheldon West

By: Stacey Bogdanow

Tell us a little about Sheldon West

Born in Toronto, raised in Peel, I graduated from Sheridan College Marketing program. Straight from college I started working as a merchandiser for a big box retailer, and then a sales representative for a roofing manufacturer for 5 years. I have recently joined CertainTeed Corporation as a Territory Manager for Ontario. I enjoy meeting people and take pride in building strong relationships. I currently live in Durham region and have been married for 2 years. During my down time, I actively play soccer and volleyball year round and enjoy doing home renovations.

How did you learn of CSC?

I heard about CSC from Anna Sulima who is a fellow member and Architectural Manager for CertainTeed. Anna mentioned that I should take part in the No Frills Trade Show and become a member.

Why join CSC?

I wanted to join CSC because I saw it as a great way to gain knowledge and network with others within the industry, learning from others and attending events.

Do you plan on taking any courses?

I do plan to take courses as I feel that if you have the opportunity to learn then you should take it. I would like to gain more knowledge about specifying and planning.

Would you encourage others to become members of the CSC – Toronto Chapter?

I would encourage joining the CSC –Toronto Chapter to anyone in the building industry. I have already mentioned it to other work colleagues and they are looking into joining as well.

How about a night at the races?

By: Brian Baird on behalf of Dinshaw Kanga

The CSC Toronto chapter is once again hosting a fun night at the Woodbine Race Track on Thursday November 7, 2013.

Included in this event is a fantastic buffet dinner with something for everyone plus a truly fun night of horse racing! All you have to do is talk to anyone who has attended this event in the past and you are sure to hear what a great time it is.

This is a perfect event to take your “significant other” to so that they can have a great night out and meet the industry people you work. How many industry functions are fun and let your spouse enjoy a night out on the town?

If you are an industry representative and want a chance to interact with key specifiers the Woodbine night is something unique and unusual that will allow you to host a guest at a truly memorable event.

Easy to get to with ample free parking, a fantastic dinner with horse races and plenty of slot machines for those so inclined the Woodbine Fun Night is a can't miss event.

See your specifier or go on line at <http://toronto.csc-dcc.ca/Membership/Upcoming+Events/> to sign up.

Student Liaison Officer's Report

By: Steve Ioannides

Good day members!

As you know I'm the CSC Toronto chapter Student Liaison Officer this season.

So you may ask, what's a Student Liaison Officer, and what role does the said person play in the grand scheme of things? Well in case you are wondering, I'll be attending post secondary institutions' career fairs, meeting post secondary institutions' officials, and generally keep my finger on the pulse of student interests for the purposes of promoting CSC. In addition, I'll prepare reports describing the events and activities attended to the executive council and post this information to the membership through our Toronto Specifier newsletter.

I look forward to a successful season as your Student Liaison Officer.

Below is a picture of Dennis Duku, a graduate of the architectural technology program at George Brown College. He sends his warm regards.

Meanwhile, I welcome your thoughts, comments, and suggestions. After all, these students are our future; so please take the time to support our association!

Steve Ioannides
(Student Officer)

2014 No Frills Trade Show!

The Trade Show Committee is in full swing finalizing the details of the Lecture Series topics, the popular Demo area and the Luncheon Speaker.

However, the biggest news is that we have changed the date! Mark **WEDNESDAY MARCH 5, 2014** on your calendars. Yes that's

correct **WEDNESDAY!** Same time, same place. The Convention Centre is involved in a large city wide event that will make the logistics of us getting in on time on the first Monday of March impossible. So the following Wednesday was chosen. Second important note is that the Chapter postal address has changed so anyone paying by cheque should take note. It is now: 28 Fallingbrook Cres, Lindsay, ON K9V 0B3. The phone/fax number, e-mail address and web site address have not changed. The revised Tradeshow Registration form is attached with the new information and postal coordinates. Now's the time to spread the word. Check out the website periodically for event updates. www.csctradeshow.com. Hope to see you all there!

Bob Mercer

Architectural Officer's Report: time to reach our Architectural Technology Students!

By: Brian L Abbey

With summer just behind us and a busy new year commencing, I thought it would be an ideal opportunity to share with you some of my thoughts on what I have been proposing and what I have achieved in respect to reaching out to students in Architecture. Many of you may already know that I have been an accredited member of the Association of Architectural Technologists of Ontario (AATO) for more than a decade and served on the Governing Council for six years. However, recently I also became an associate member of the Ontario Association of Applied Architectural Sciences (OAAAS) that shares some of the same goal as the AATO when it comes to educating college and university students in the advancement of a fulfilling career in architecture. My personal goal is to bring both the AATO and the OAAAS even closer together, with the hope of some kind of meaningful future affiliation for the benefit everyone.

During the AATO's 2013 Annual General Meeting held in the Blue Mountain Resort at the end of April, I pledged to form a new Committee, the Student Liaison Committee (SLC) and over the summer months I wrote a draft policy for the committee to be implemented this fall semester throughout the Ontario Colleges and Universities that have an approved Architectural Technology and Building Science Program.

The intention of the SLC policy is to ensure that the Student Liaison Officer is appointed by, and sits on Council in strict accordance with the AATO Act and Bylaws, something that has not happened in recent years. The objective, in short, is for each college or university to form their own AATO student liaison subcommittee, with each subcommittee electing their own chair; and having each of those chairs sit on the SLC. They will in turn, elect their Chair who will automatically become the twelfth AATO Councilor with full voting rights. The aim is for the Student Liaison to be the catalyst between the AATO and the Colleges and Universities to share, review and implement ideas and concerns that either party may have. That will ultimately improve the overall curriculum for the betterment of the profession as a whole.

Brian L Abbey
(Architectural Officer)

Although this AATO Student Liaison Program is a first step, it is something that I would be very keen to see be endorsed by other Associations and Organizations within the industry and in particular the OAAAS under the control of OAA. As I mentioned previously in this article, one of my personal goals (and opinion) is to see a much closer relationship between the AATO and OAAAS as I think both could benefit from each other. My belief is that many AATO members who

are fully Accredited Architectural Technologists would relish the opportunity to improve their qualifications and scope of work by taking advantage of the Licensed Technologist OAA model by taking the OAA Lecture Series and Entrance Examination with an exemption to all the prerequisites required for interns.

On the other hand, I also believe that the majority of Technologists OAAAS and Licensed Technologists OAA would love to see the word "Architectural" added to their designation but at present cannot because "Architectural Technologist" is a protected title that belongs to the AATO. However, if some form of a reciprocal membership arrangement, such as a Memorandum of Understanding (MOU) were to be introduced, perhaps some serious benefits could be accomplished by both Associations. The MOU would allow Accredited Architectural Technologists AATO to achieve a higher level of credentials through the OAA program, and Technologists OAAAS and Licensed Technologists OAA to use "Architectural" to change their designation to Arch. Tech. OAAAS and Lic. Arch. Tech. OAA.

As I have said, this is only my personal opinion but I will be pressing both associations to consider these ideas so as to evaluate the benefits of membership for architectural technology students and the general public at large. This will help dispel the current confusion that exists.

This September, we will be offering the Principles of Construction Documentation (PCD) course, at the

Northern District Public starting Monday,

September 9th 2013 and will run for 12 weeks.

Another course we will be offering is the Specifier 2, at 120 Carlton St. starting Wednesday, September 11th, 2013 and will run for 13 weeks. Last but not

least, is the Technical

Representative (TR) course, at the Alumicor Head office starting on Monday, September 9th, 2013 and will run for 14 weeks. Courses details, including location, costs and times can be found on CSC Toronto Chapter web site. Visit <http://toronto.csc-dcc.ca/Education/Education+in+Toronto/> for more information and to register.

Register early to avoid disappointment. Please remember that registration and payment must be received prior to the issuance of a text book. Any cancellations must be in writing. Cancellations one week prior to the start of the course will be refunded up to 50 per cent of the registration fee. Cancellations after the start of the course will not be refunded. The other CSC courses, Construction Contract Administer, Specifier 1 and/or Technical Representative (TR) courses will be offered next the year if there is enough interest. Please visit the CSC Association web site for detailed descriptions of these courses.

If you have any questions about the courses listed above, please contact Paul Wong, Professional Development Officer by email at pwong.csc@gmail.com.

2nd Annual Peer Discussion Group for RSW, CCCA, CTR and CSP

By: Isabelle Champagne

CSC Toronto Chapter is inviting you to its 2nd peer discussion group. Launched in the fall of 2012 to enhance the development and professionalism of our members, this discussion group is meant to be a mentoring tool for those in the process of obtaining one of the above designations.

Isabelle Champagne
(Marketing Officer)

The initiative involves creating a developmental relationship program outside the working environment. The first meeting held last year saw 24 people in attendance discuss various topics. It was also during that meeting that the idea of creating an electronic forum for ongoing discussion was suggested. Since then, the forum has been created and several mentoring relationships have been solidified.

It is now time for a second face-to-face meeting. We are pleased to invite you to join us on Tuesday September 24, 2013 at 6:00 pm in Committee Room #1, at North York Civic Centre, 5100 Yonge Street, North York. A light dinner will be provided. Access by TTC : North York Centre Subway Station.

Contact Isabelle Champagne at champagnei@chicagometallic.com or Paul Wong at pwong.csc@gmail.com to register. Deadline is September 17.

Watch your inbox for more details.

MEETING NOTICE

LUNCHEON PRESENTATION

EFFECTIVE INSULATING SOLUTIONS

Other Chapters

presentation topic:

Energy efficiency is a vital milestone in the drive towards a sustainable future. New buildings need to meet exceptionally high standards of energy efficiency and existing ones must be retrofitted to increase their energy performance. Today, these measures can pay for themselves, provide healthier and more comfortable places to live and work, and have a positive long term impact on the environment. Stone wool insulating systems and products allow architects and building engineers to create firesafe, energy efficient buildings within a variety of applications which include flat, conventional roofs. The innate structure and properties of stone wool have natural advantages built right in: fire retardant, sound absorbent, moisture resistant, vapor permeable, dimensionally stable, and more. U.S. President Barak Obama, said it best, "Insulation is sexy" and we couldn't agree more.

seminar presenter:

Iain Stuart

Iain Stuart, earned his B.Sc. in 2005 and began his career with Roxul in 2007 as a Customer Service representative, quickly moving to the Technical Department where he spent 5 years prior to his recent transition into Specifications. Iain has a strong working knowledge of the Building Code, Acoustics, and Building Science, and is working towards his (CTR) Certified Technical Representative designation through CSC.

In his spare time Iain competes in Triathlons and weekly helps Food For Life package end of day bread and pastries in Oakville for the daily distribution of perishable food items in the Halton Region.
