[Director's Message](#)

As always, it was so good to see all of the Directors and Executive Committee during the weekend! It was also great to see new faces, and learn more about them, and bringing fresh ideas and perspective to our discussions. During the meeting on Saturday, there were a few updates which I'll provide brief summaries about.

CSC National News In Brief

CSC Association Committees

At the core of CSC's national initiatives are the dedicated volunteers who serve on our Association Committees, including the various subcommittees under the Education and Certification Committee and the Technical Studies Committee. These groups are far more than administrative teams. They are active, engaged hubs of collaboration and innovation. From shaping course content and certification pathways to developing technical guidance and reviewing key industry documents like CCDC contracts, their work keeps CSC current, credible, and connected to real-world industry needs. By fostering cross-committee communication and ensuring alignment with member insights, these committees bridge the gap between local experiences and national strategy. Their efforts help ensure all members across Canada are informed, supported, and empowered. While their work often happens behind the scenes, its impact is visible in every standard, publication, and program we offer. CSC is always looking for passionate and knowledgeable volunteers to lend their voice, experience, and perspective. Whether your interest lies in education, technical studies, document review, or emerging industry issues, there's a place for you. Volunteering is a chance not only to give back, but also to help shape the future of our profession, grow your network, and make your voice heard in meaningful ways. We've heard your desire for transparency and connection—this newsletter is one way we're bringing committee efforts into the spotlight. Interested in getting involved?

Another successful year for our Connections Cafe 2025!

Thank you to all of our organizers, sponsors, and vendors for making this day a success.
Big thank you to Garth Huber and Dustin Williamson on our executive committee for organizing the event

MEMBER SPOTLIGHT

The CSC Regina Chapter would like to formally recognize and congratulate Ryan McEwen on obtaining the CCCA designation!

RYAN MCEWEN

How long have you been a member of the CSC?

I have been a full time member of CSC since 2009. I also held a 1-year membership in 2002 as part of my schooling.

What motivated you to receive the CCCA designation?

As a significant part of my role involves contract administration, I felt it necessary to have the education, experience, and designation for performing this work. My employer is, and has been, involved quite extensively with CSC and I felt having the designation would also be beneficial to the firm.

What advice would you give to other members interested in receiving their designation

Contract administration is a huge part of design and construction industries and having the additional knowledge and hands on experience of the CCCA designation is important. Understanding the different aspects and complexities which are a part of CA help improve the delivery of projects and the communication between all parties of a project.

Anything else you want to share about yourself.

I have been working in the Architectural field for 20+ years and every day there is always something new to learn. I always want to keep learning and keep up with the newest developments.
